## DETAILED ACTION

### *Drawings*

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-  
(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English.

3. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang et al. (Wang herein after) (US 7,200,799 B2).

Re Claims 1 and 4, Wang discloses a method and a decoder for decoding data, said method comprising iterations with some steps (SISO1, SISO2) (SISO decoder 1 **221**, SISO decoder 2 **222**, Figure 2B) using windows (WID) (segmented sliding window, column 7 line 35 – column 8 line 27) of input data, characterized in that the method comprises, for a current window (WID) of a step (SISO1, SISO2) within an iteration the steps of:

Performing a forward recursion (column 3 line 54 – column 4 line 13), wherein said forward recursion is initialized with a forward state metric vector ( $\alpha$ ) from a upper stake (STK) of a previous window of the same step (SISO1, SISO2) of a previous iteration (Figure 4, column 7 line 35 – column 8 line 27), a window (WID) comprising a lower and an upper stake (STK) (Figure 3, column 4 line 21 – column 5 line 24), and

Performing a backward recursion (column 3 line 54 – column 4 line 13), wherein said backward recursion is initialized with a backward state metric vector ( $\beta$ ) from a lower stake (STK) of a next window of the same step (SISO1, SISO2) of a previous iteration (Figure 4, column 7 line 35 – column 8 line 27).

Re Claim 2, Wang discloses a method as claimed in claim 1, characterized in that the forward state metric vector ( $\alpha$ ) computed last is stored in an upper stake of said current window (WID) during the forward recursion, and the backward state metric vector ( $\beta$ ) computed last is stored in the lower stake (STK) of said current window (WID) during the backward recursion (Figure 3, column 4 line 21 – column 5 line 24).

Re Claim 3, Wang discloses a method as claimed in claim 1, characterized in that all the windows (WID) of a step (SISO) are processed in parallel (column 7 line 36 – column 9 line 6).

Re Claim 5, Wang discloses a receiver adapted to receive input data, said input data being processed by the decoder as claimed in claim 4 (Figure 1).

Re Claim 6, Wang discloses a computer program product for a receiver, comprising a set of instructions which, when loaded into said receiver, causes the receiver to carry out the method as claimed in claims 1 to 3 (column 16 lines 16-54).

Re Claim 7, Wang discloses a computer program product for a computer, comprising a set of instructions which, when loaded into said computer, causes the computer to carry out the method as claimed in claims 1 to 3 (column 16 lines 16-54).
